Classic Chemicals

Redefining Agriculture
Bio-technology

Profile:

Classic Chemicals is a pioneering agri-biotech company dedicated to the advancement of agriculture and animal health through cutting-edge research, innovative development, and high-quality manufacturing. Founded in 1995, our company has grown to become a trusted partner in the industry, known for delivering solutions that enhance crop productivity, protect against disease, and improve overall yield. Our state-of-the-art manufacturing facility and laboratory, strategically located 15 kilometres south from Rajkot, India, stands as a testament to our commitment to excellence and innovation.

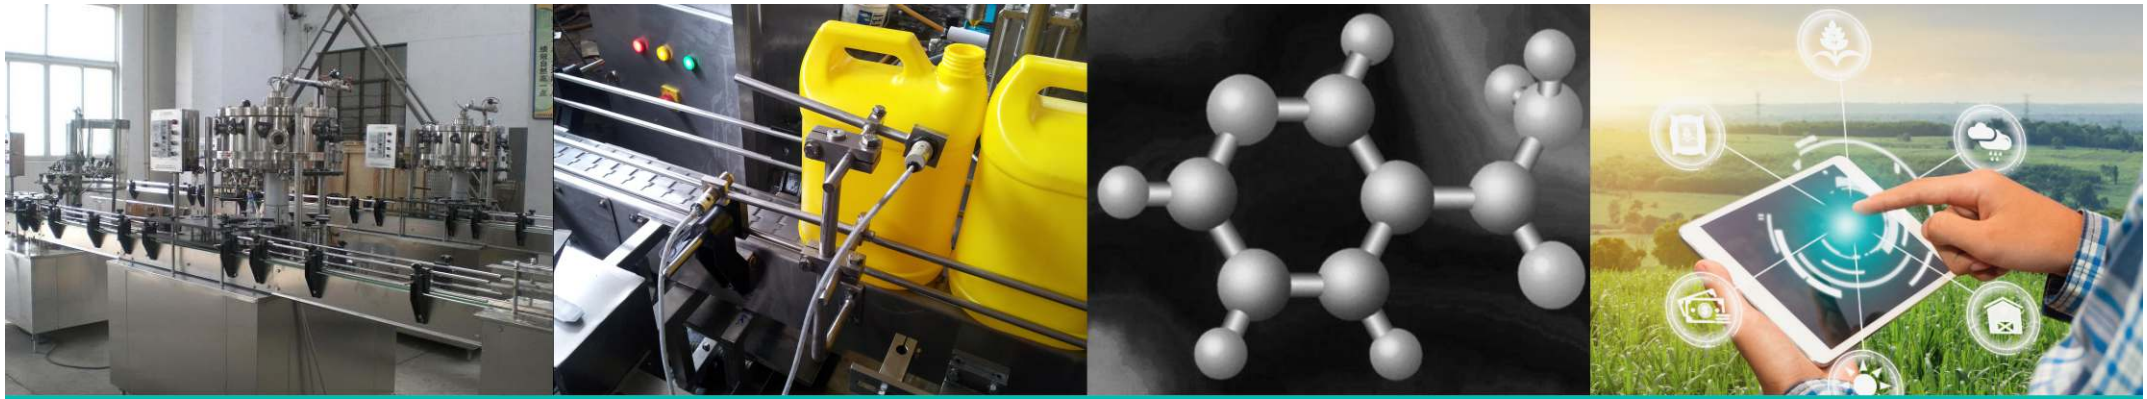

At Classic Chemicals, we offer a comprehensive suite of services, specializing in research and manufacturing. Our capabilities span the entire spectrum of product development—from initial research and formulation to full-scale commercialization of different agrochemicals formulation like EC, SL, SC, CS, ZC, WG and WDG. By leveraging our advanced technologies and expertise, we are able to create tailored solutions that meet the specific needs of our clients, ensuring that their products achieve the highest standards of efficacy, quality, and safety.

Mission :

- To become global leader in chemical and biological technologies by application of science in research, development, manufacturing and sales of crop and animal health products that promote health, protect against diseases and improve yield
- To continuously grow and improve by innovation in the areas of our expertise
- To maintain excellence in our markets by providing highest quality of products and services to our customer through technology, innovation, regulatory compliance and expert workforce
